Mark Hinojosa
Full-Stack Web Developer

CELL: (956) 357-9036 • E-MAIL: markhinojosa1212@gmail.com • Website:
http://fullstackdevatx.com/ •github:https://github.com/MarkHinojosa• Austin, TX• 78728

SKILLS

- Proficiency with **Javascript**, **Git**, **React, React-Native, React-Redux**, **Node**, **Express, HTML**, and **CSS**
- Experience with databases like **Firebase, AWS,** and **MongoDB**
- Experience building API's and leveraging external API's
- Experience with **SASS** based CSS frameworks like **Semantic** and **Bootstrap**
- Experience with both **Windows** and **Linux** based Operating Systems

PROFILE

A technical person at heart. I love to learn new things and putting these new tools to the test. My abilities flourish most in team driven projects and culture as I enjoy contributing my ideas, building on others ideas and aiding other members of the team as needed.

EDUCATION

Austin Coding Academy (2017 - 2018)
Full-Stack Web Development
Developed web applications that involved **React**, **React-Redux**, and **React Router** to handle the front-end while **Express.js**, **Node.js**, **Babel** and **MongDB** served the back-end. Apps then deployed to Heroku.

Texas State Technical College (2006 - 2009)
Mechatronics Technology
Hands on industrial applications of technologies centered around **Robotics**. Studied technologies include DC, AC, Pneumatics, Hydraulics, and PLC Programming.

EXPERIENCE

Hercules (July 2018 – July 2019)

Fullstack React- Native Developer / Lead QA

Developed both front-end and back-end solutions for a mobile Decentralized Application which is available on the **Google Store**. Solely created MVP's that would be used to garner funding from large multi-national corporations. Implemented a payment system on the Ethereum Block-chain using the Edge wallet. I also had responsibilities of managing, QAing and implementing contract work. Technologies used: **Git**, **React-Native**, **React-Redux**, **Edge**, **Firebase**, **Firestore**, **StorJ**, **IPFS**, and **Factom**.

Austin Coding Academy (April 2018 - July 2018)

Teachers Assistant

In this role, I introduced aspiring web developers to foundational tools and techniques. The tech stack included Git, Github, HTML, CSS and Javascript.

Hobbies: My hobbies include board games, computer and motorcycle repair.
